2.0	20/11/2023	Policy Working Group	Policy Statement	

Purpose:

The purpose of this policy is to establish guidelines for the appropriate use of email and internet resources provided by Jacky's. This policy aims to ensure the security of company information, maintain a productive work environment, and comply with legal and regulatory requirements.

Policy Statement:

Jacky's recognizes that use of the internet and email is necessary in the workplace, and employees are required to use both responsibly and lawfully, as unacceptable use can place Jacky's and others at risk for harassment, security breaches and similar issues. This policy outlines the guidelines for acceptable use of Jack's technology systems.

Email and Internet Usage Guidelines:

1. Internet / Email is a business tool to facilitate communication. It should be used primarily for business-related purposes, i.e. to communicate with other employees, business partners, suppliers & customers, to research relevant topics and obtain useful business information.
2. The management requires users to respect copyright, software licensing rules, property rights, privacy and prerogatives of others, existing rules in the company apply to your conduct whilst using internet / email too, including, in particular, those that deal with intellectual property protection, privacy, harassment, information and data security, and confidentiality.
3. Employees must not download & distribute software, images, video, sound files, music or games etc. unless there is an express business-related use for the material. Internet / Email facility should not be used to deliberately propagate any virus, worm or trap door program code. The email system shall not be used for the creation or distribution of any disruptive or offensive messages, including offensive comments about race, gender, disabilities, age, sexual orientation, pornography, religious beliefs and practice, political beliefs, national origin etc. Employees who receive any emails with this content from any colleague should report the matter to their supervisor immediately.

4. Unnecessary or unauthorized internet usage causes network congestion, it slows other users, takes away from work time, consumes supplies, and ties up other shared resources. Such usage may also give rise to negative publicity for the organization and expose us to significant legal liabilities.
5. Connectivity to the Internet & email offers a wealth of potential benefits, but it can also expose the organization to the risk of data corruption if we do not follow appropriate security & usage discipline. This may mean preventing machines with sensitive data or applications from connecting to the Internet entirely, or it may mean certain users must be prevented from using certain features. The overriding principle is that data security is to be the user's first concern.
6. E-Mail ID's must be configured in Microsoft Outlook or Microsoft Mail. Mails older than 1 year should be archived unless required statutorily.
7. No email attachments over 10MB will be permitted to be either sent or received unless otherwise deemed by the COO.
8. Email password needs to be changed every 90 days unless otherwise deemed by the COO.
9. The standard fonts and wordings to be used in all office communications and email signatures to be as per organization's policy.
10. Web filter will be configured by the IT team to restrict unauthorized usage of internet.

Monitoring:

The company reserves the right to monitor email and internet usage to ensure compliance with this policy. Employees should have no expectation of privacy when using company resources.

Consequences of Violation:

Violations of this policy may result in disciplinary action, up to and including termination of employment. Legal action may be pursued if the violation involves illegal activities.

Review and Revision:

This policy will be reviewed periodically and updated as necessary. Employees will be notified of any changes to the policy.

I acknowledge that I have read and understand the Jacky's Email and Internet Usage Policy.
