Revision	Date	Author	Change Reference	Reason for Change
2.0	20/11/2023	Policy Working Group	Policy Statement	Updated about Work from Home Policy

Purpose:

This policy addresses the actions that must be taken by all Jacky's employees who have a company-issued laptop or desktop.

Policy Statement:

All laptops acquired for employees on behalf of the Company shall be deemed to be Company property. Each employee issued with a laptop shall be responsible for the security of that laptop, regardless of whether the laptop is used in the office, at the employee's place of residence, or in any other location such as a hotel, conference room, car, airport etc. Employee shall ensure security of the as per the stated guidelines. Laptops must compulsorily be protected by a username and password. Laptop to be taken on daily basis in case of work from home Implemented by management.

One Drive Data Security Controls:

Employees are expected to ensure the security of the data within their laptops. In this regard you are to adhere to the following:

- You are personally accountable for all network and systems access under your user ID, so keep your password secret. Never share it with anyone, not even members of your family, friends, or IT staff.
- Corporate laptops are provided for official use for authorized employees. Do not loan your laptop or allow it to be used by others such as family and friends.
- Avoid leaving your laptop unattended and logged-on. Always log off or lock while walking away from the machine.
- Always shutdown the system while you are offline for long time and after your work.

Virus Protection:

- Email attachments are now the number one source of computer viruses. Avoid opening any email attachment unless you were expecting to receive it from that person.
- Always virus-scan any files downloaded to your computer from any source (CD/DVD, USB hard disks and memory sticks, network files, email attachments or files from the Internet). Virus scans normally happen automatically if your virus definitions are up to date, but you can also initiate manual scans if you wish to be certain.
- Report any security incidents (such as virus infections) promptly to the IT Help to minimize the damage.
- Respond immediately to any virus warning message on your computer, or if you suspect a virus (e.g., by unusual file activity) by contacting the IT Help. Do not forward any files or upload data onto the network if you suspect your PC might be infected.

Data Backups:

- Make sure all your working data is stored in the One Drive. Please take help of IT team to ensure it.
- Remember, if the laptop is stolen, lost or damaged, or if it simply malfunctions, it may be impossible to retrieve any of the data from the laptop. Saving the data in one drive will save you a lot of heartache and extra work.

Use of Unauthorized Software/Content:

- Employees are required to ensure that they do not download, install or use unauthorized software programs. Unauthorized software could introduce serious security vulnerabilities into the Company networks as well as affecting the working of your laptop. Software packages that permit the computer to be 'remote controlled' and 'hacking tools' are explicitly forbidden on Company equipment unless they have been explicitly pre-authorized by Company management for furtherance of legitimate business purposes of the Company.

- All software or other programs that are downloaded onto the Company provided laptop, whether they are so downloaded in accordance with the business needs of the Company, or the directions of the Company management in this regard, shall immediately become the sole and exclusive property of the Company, and henceforth can only be used in accordance with the directions of the Company in this regard. Further, any programs or software that were pre-installed at the time of the possession of the laptop being handed over to the Company, cannot be altered or removed, whether permanently or temporarily, in any manner whatsoever save and otherwise than in accordance with the directions of the Company in this regard.
- The employee shall not install any unauthorized accessories/software like, which may cause problems to the functioning of the laptop and strictly adhere to Company's software.

Laws, regulations, and Policy:

You must comply with relevant laws, regulations, and policies applying to the use of computers and information. Various corporate security policies apply to laptops, the data they contain, and network access (including use of internet).

Enforcement:

Violation of this policy may be grounds for disciplinary action in line with the HR policy. If an employee's laptop is stolen due to negligence, the employee will be responsible for the cost of replacing the laptop.

Please sign below to indicate receipt of the laptop security policy and to authorize the deduction of wages if the laptop is lost or stolen.
